The Fleet Reserve Association (FRA) supports the “Coast Guard Quality of Life Act” (S. 1760) that would improve the quality of life for members of the Coast Guard and their families by expanding the availability of quality child care, creating educational opportunities for spouses of active duty members and smoothing the transition to post-service life.

The Association appreciates your strong leadership on this issue and has listed this legislation on its Action Center so members can contact elected officials to ask for their support. FRA stands ready to provide further assistance in advancing this legislation and the point of contact at FRA is John Davis, Director of Legislative Programs, at the above numbers or (john@fra.org).

Sincerely,

THOMAS J. SNEE
National Executive Director
